

Lethality. Readiness. Efficiency.

Mission-centric
data infrastructure
for the U.S. Air Force.

The modern battlespace is digital. Mission success now hinges on the ability to collect, move, secure, and analyze data—at speed and scale. From resilient storage to high-performance computing, Hitachi Vantara Federal delivers the data infrastructure backbone the U.S. Air Force depends on to enable decision advantage, accelerate AI/ML adoption, and power tomorrow's missions.

Meet Hitachi Vantara Federal

Hitachi Vantara Federal is the trusted leader in mission-centric data solutions for the United States federal government.

As a FOCI-mitigated Hitachi subsidiary, we securely deliver and support transformative digital solutions. Our comprehensive range of hybrid cloud and data fabric solutions advance federal missions at all data maturity levels.

We provide dedicated 24x7x365 Tier 1 Support and hold a TS Facility clearance, and are trusted by all U.S. Armed Forces and Cabinet Agencies.

Simplify and modernize data infrastructure.

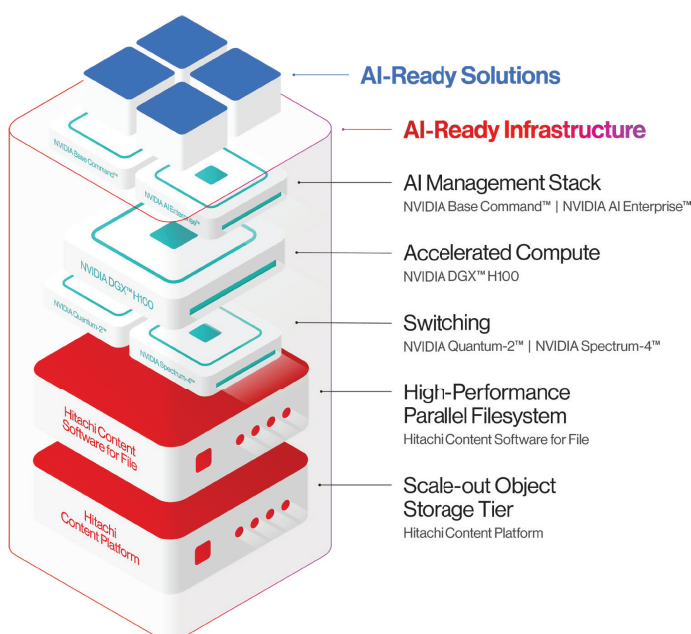

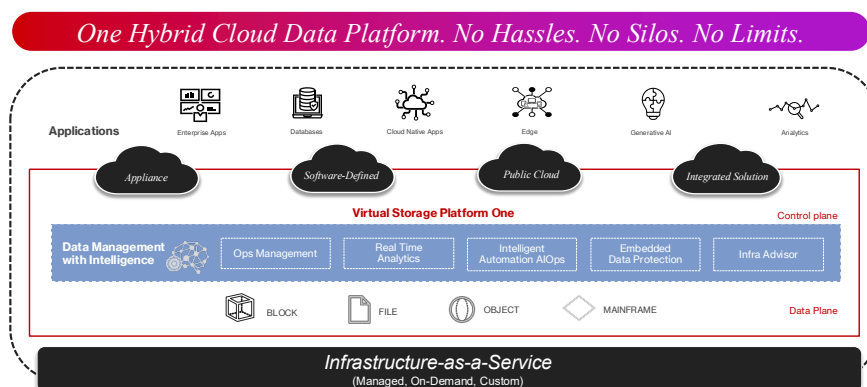

Hitachi Virtual Storage Platform One (VSP One) is an all-in one hybrid cloud data platform powers infrastructure, data and apps without constraints. This platform is designed to simplify the complex landscape of data storage, enabling organizations to consume and manage structured and unstructured data across a distributed hybrid environment across on premises and public cloud environments seamlessly.

Power AI & high-performance workloads.

Hitachi iQ delivers a fully integrated AI infrastructure stack that unifies data, models, and orchestration—eliminating complexity and manual data movement. Built for federal missions, it accelerates AI outcomes, reduces latency, and simplifies operations across training, inference, and analytics in one seamless, secure platform, offering fastest time to insight by accelerating GPU workloads by over 20x.

Secure your most strategic asset: Data.

Hitachi Data Protection Suite (HDPS) from Commvault and Hitachi provides your agency with a complete solution to protect against ransomware and assure fast and reliable recovery of data in the event of an attack. From early detection of threats to immutable storage to simplified, fast recovery of data, we provide an end-to-end solution that's built to ensure data integrity and mission continuity.
